A completed copy of this form should be attached in front of each of the solution sets that you turn in.

Please list the sources of information which you used for each of the problems on this assignment. If they are applicable, mention other students by name who provided ideas to you, any textbooks that you used, any reference to the instructor’s solutions to problems from previous semesters, etc. In addition to saying what sources you used, briefly describe the ideas that you got from the source. If you worked together with others, to the extent possible, acknowledge who came up with the key ideas.

On the form below, list each of the problems assigned and give a statement about each. If you used no sources for the problem, say so explicitly. Do not simply leave the form blank.
